

LED Scoreboard System

OnScreen designs and develops scoreboards for a wide range of sports. We offer standard solutions as well as custom-built scoreboards. OnScreen scoreboards are designed to give spectators, players and sponsors the best possible experience of the game

These LED displays are ideal for promoting events, firing up the crowd and keeping fans informed and entertained. The message display is for showing game-in-progress statistics from the Mondo® controller and OnScreen LED Sportsystem® software, animations, informational messages and advertisements.

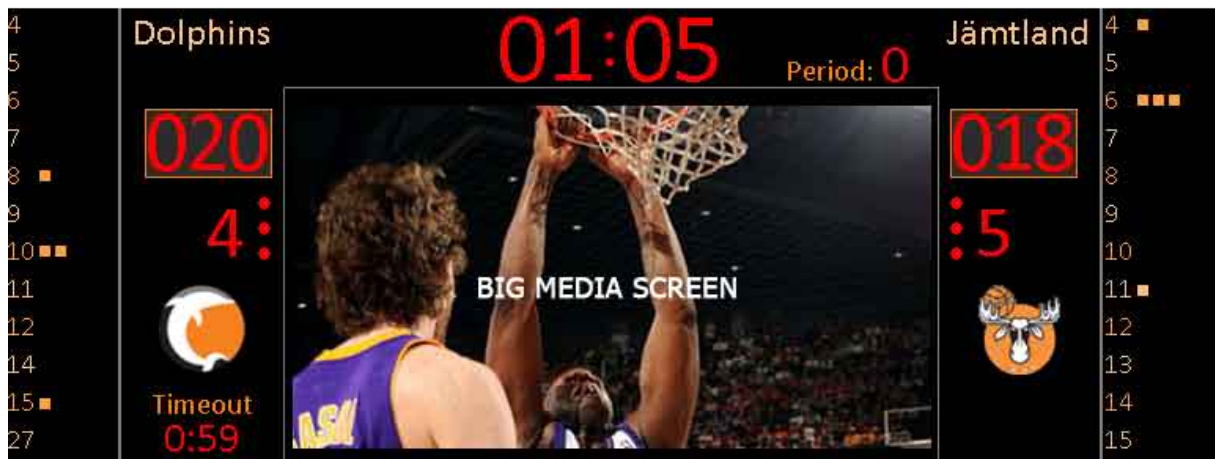

Today OnScreen LED Sportsystem® scoreboard displays game information for basketball, volleyball, and handball. Coming up soon also for floorball and soccer.

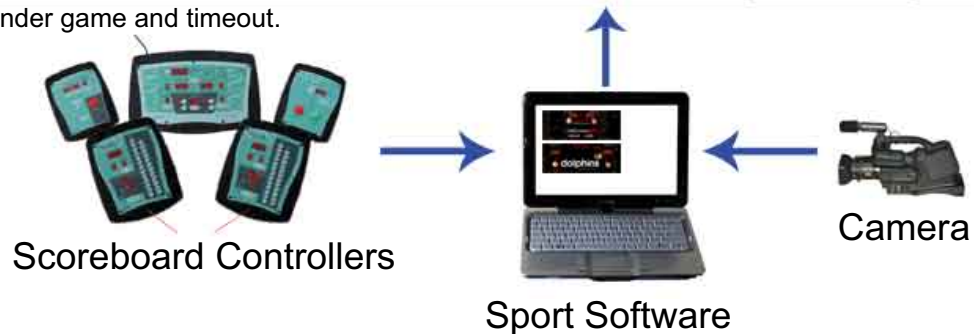

LED Scoreboard System

Os Series video displays show dynamic live video, dazzling graphics, custom animation, full-color graphics and logos, up-to-the-minute sports statistics, timing and results information and more. It's more than a display system.

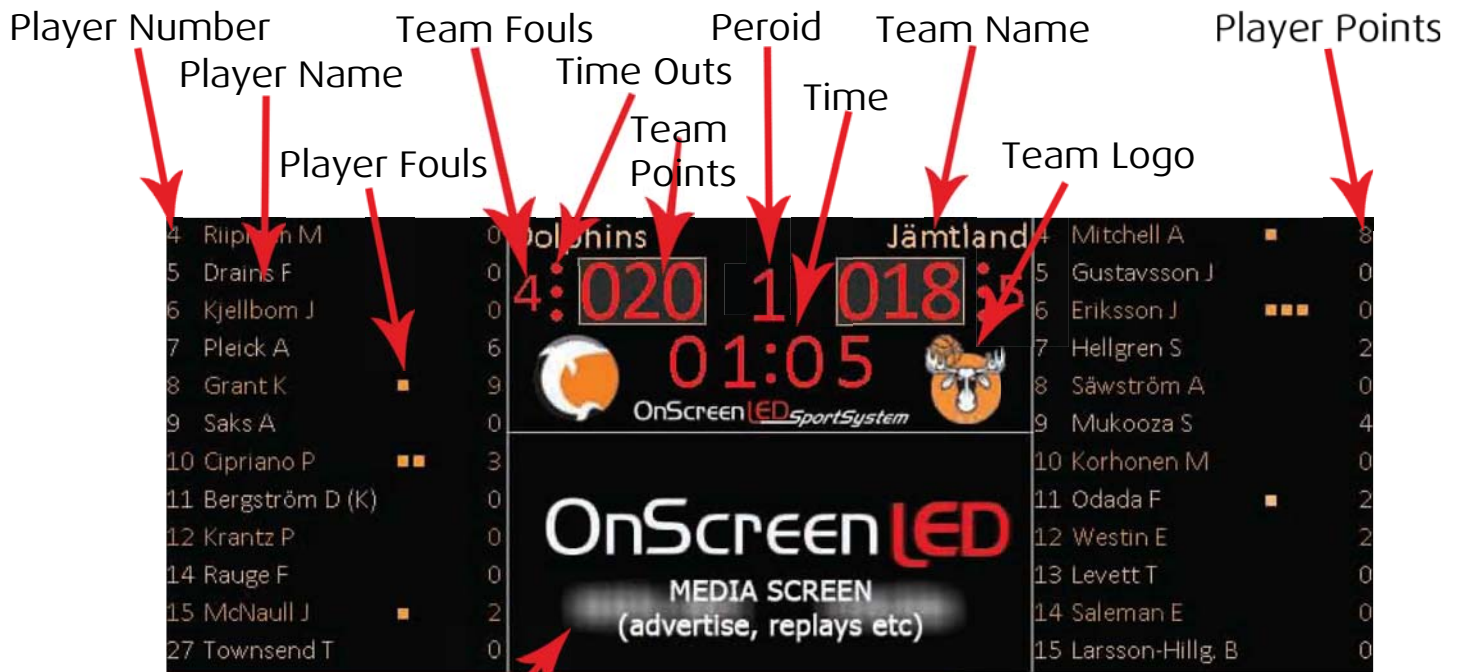

Whatever you can imagine, Os technology and OnScreens control systems technologies can bring it to life.

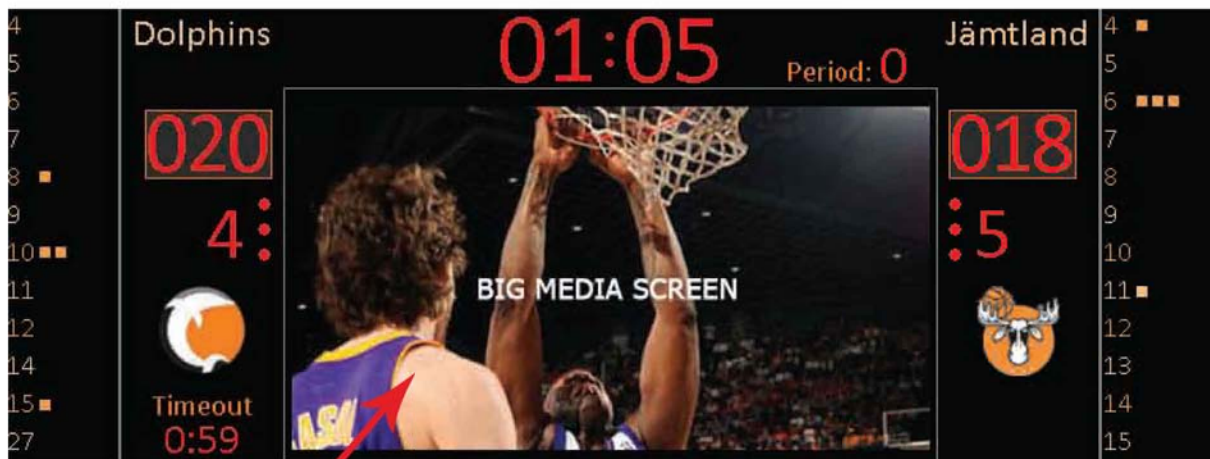

Screenshoot under game and timeout.

LED Scoreboard System

Advertising during the time the match is played. During the match, you can show the spectators advertising or other useful information relating to the game.

At timeout or at halftime the scoreboard will automatically turned into a big mediascreen.

LED Scoreboard System

FEATURES

- Seamless presentation of scoreboard and media on big LED screens.
- Intelligent system automatically switch display modes depending on game input. (For example big media screens during timeouts and halftime.)
- Several interactive features like player presentation on screen when player scores or makes a foul.
- Different media playlists for gametime, timeouts and halftime.
- Customizable for your team (colours and layout).
- Play game highlights on screen.
- Put the scoreboard live on internet.
- Play movies on the total screen area at events where no score is needed.
- Write instant messages to the crowd quick and easy.
- Can be configured for downloading other league results from internet for presentation on screen during games.
- Optional size of LED screen.
- Optional number of screens can be controlled.

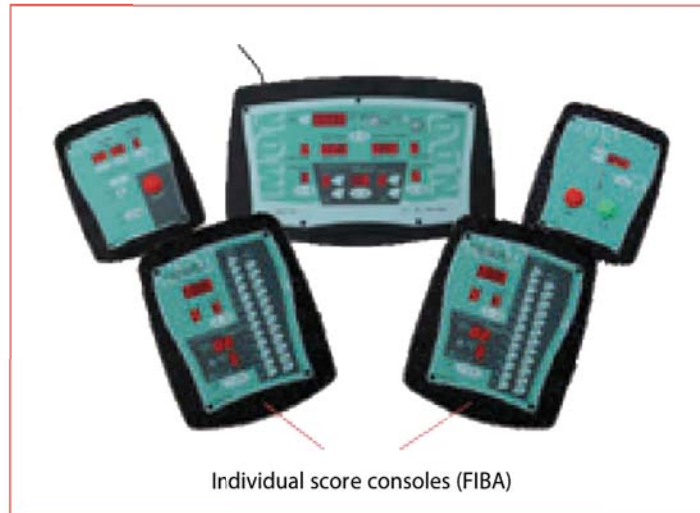

Team score/game clock

Functionality:

teamname and teamlogo, player name and player number, player points and player fouls, team fouls, time-outs, period, halvtime and advertising under the game.

FIBA Consoles (Ref. CON014)

Console unit (Hercules + possession + individual score FIBA)

These FIBA Consoles are designed for top competition and managed by four table judges. They are comprised of two individual score consoles, which are joined to the HERCULES console group, which is standard supply with the MONDO scoreboard.

The FIBA consoles are connected to the main HERCULES console in such a way that the data entered are divided into two parts: the fouls and points of the home team are controlled by one person and the fouls and points of the guest team are controlled by another. This prevents any confusion in the entry of data.

In this way, the whole set of easy-to-operate consoles can be operated by four table judges, as it is made up of one time console, one possession console, one individual score console for the HOME team and one individual score console for the GUEST team.

Entering points into side console:

1.- On the score button column, press the button of the number of the player who the points are assigned to, as many times as points to be added (deducted). The player number will be shown on the player display. The number of points will appear on the score display.

2.- Press +enter (-enter) to confirm the entry of data.

3.- The points will be added (deducted) to/from those of the team, showing the total on the score display, as well as on the relative display of the main console.

Entering fouls into side console:

1. On the 3foul button column, press the button of the number of the player who the fouls are assigned to, once or twice depending on whether we wish to add (deduct) one or two fouls, respectively. The number of the player will be shown on the player display. The number of fouls will be shown on the two luminous foul dots.

2. Press +enter (-enter) to confirm the entry of data.

3. The fouls will be added (deducted) to/from those of the team, showing the total on the fouls display, as well as on the display corresponding to the main console.

Entering time outs:

Press button +6 of the relative home or guest time out depending on whether we wish to add or deduct, respectively. The value will be shown on the time out display.

Note: This action does not require confirmation with the enter button.

CHARACTERISTICS OF THE PACKED PRODUCT

FIBA CONSOLES

Packing:	Case
Packed dimensions:	52x41x17 cm
Packed weight:	4 kg
Packed volume:	0,036 m ³

*The colour of the products is orientative.

*MONDO reserves the right to modify this information without prior notice.

4-sided possession scoreboard (Ref. MMF4TIR)

4-sided possession scoreboard

Set of two possession scoreboards with game time and with four sides each one. They are approved by the FIBA and are designed to be used in top competition events, to be placed on the basketball stands. It is connected to the console by radiofrequency. The main scoreboard must be MONDO to be synchronised with this possession scoreboard.

Manufactured in black goffered aluminium frame, each one has a total weight of approximately 40 kilos. Its dimensions (including the luminous indicator) are 900x580x580 mm.

All the digits are made up with high luminosity LEDs placed behind methacrylate sheets to be easily seen.

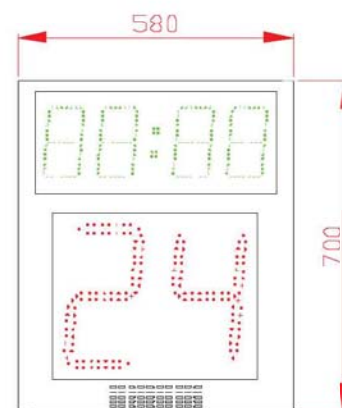

The digits that indicate the possession time are red-coloured and 30 cm high.

The digits that indicate game time are green-coloured and 15 cm high.

The upper warning light comes on automatically when the ball possession ends. The claxon it contains also sounds.

The scoreboard must be fixed to the bottom with four screws to a specific support placed on the basketball stand for this purpose (this support is not included).

The scoreboard comes with a MONDO possession console from which this scoreboard can be easily operated.

CHARACTERISTICS OF THE PACKED PRODUCT

POSSESSION SCOREBOARD

Packaging:	Cardboard box + EPS
Packed dimensions:	100x65x65 cm
Packed weight:	45 kg
Packed volume:	0,42 m ³

*The colour of the products is orientative.

LED Scoreboard System

OnScreen's sports perimeter enables perfect, flicker-free reproduction of brands through its excellent daylight readability, superior contrast levels, easy synchronization with professional camera equipment, and individual color optimization.

OnScreen LED sports perimeter is designed for both fixed and mobile applications.

OnScreens Indoor LED Video Displays provide the benefits of less front-end equipment and fewer personnel required for operation compared to other live video options.

These displays are an excellent complement to indoor scoreboards and provide an affordable solution for smaller facilities looking for a professional live video experience.

Sport Software

With OnScreens sport software, not only can operators keep track of scores and stats, but they can also send game information to scoreboards and displays to show sports fans everything they need to know.

From the major leagues to your local high school, coaches and control room operators alike trust the accuracy and ease of use of OnScreens sport software.
